INTRODUCING **RIO ARC**

SMART HEATING JUST GOT SMARTER

CONNECTS DIRECTLY TO

EXCEPTIONAL DESIGN MEETS ULTIMATE CONTROL

STYLISH LOOKS

The sleek, super-slim curved glass finish of the ARC adds a stunning modern look to your home or office.

ENERGY EFFICIENT

Our unique heating element combined with our precise control systems deliver up to a 40% reduction on heating costs.

WORKS WITH Apple HomeKit™

One of the only heaters approved by Apple and fully compatible with Apple HomeKit™, Amazon Alexa and Google Assistant.

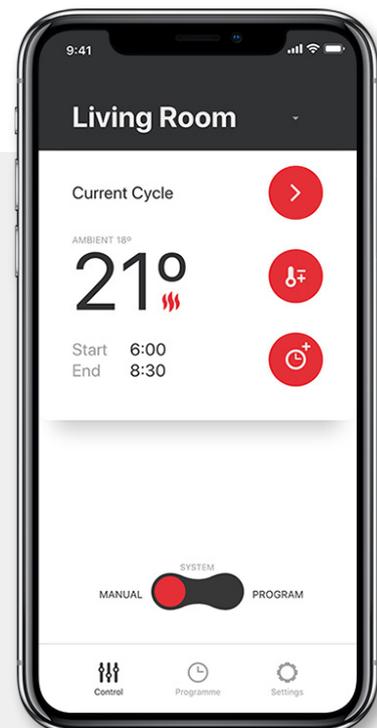

TOTAL CONTROL

Access your heating from anywhere in the world, without a thermostat, through our dedicated servers or smart home partners.

DOWNLOAD THE APP

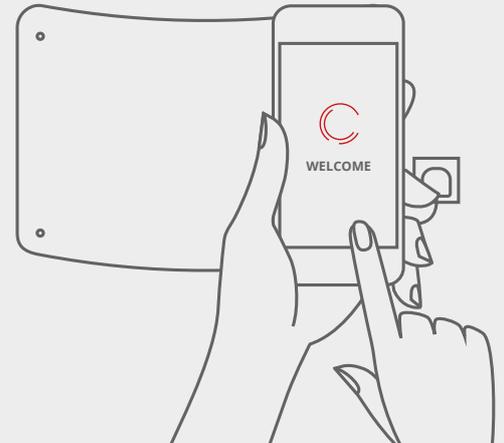

You can download our app on any device from the App Store or Google Play. Our app is free to use and it will make controlling your heating easy and economical.

Instant Connectivity

Simple, immediate set up

One of the features that set the ARC apart from standard heaters is the direct link between the in-built Wi-Fi and the dedicated Rio servers. This means you don't need any other expensive devices to connect your ARC to Apple HomeKit, Amazon Alexa or Google Assistant. Better still, set up is as simple as plugging in and scanning your ARC with your Apple or Android device. No hassle, no headaches.

ARC Multi Room

Zonal temperature control

ARC Multi Room functionality allows you to add an ARC heater to several rooms in your home or office and manage each one individually. Different times, different heat levels... just the same simple control system and fast, efficient temperature control. The ARC allows you to set these different comfort levels for each room either in-app or via Apple HomeKit, Amazon Alexa or Google Assistant.

Award-Winning Design

An app that delivers

We strive for the best, so it's no surprise that the Rio Heating app at the core of every ARC has been designed by an award-winning, UK-based app developer that specialises in ease of use and effective control. Whether you want to program different heaters at different times, group rooms for ease, or simply turn on the heating on the way home from work, the app has you covered.

Rio ARC Smart Convector Heater

Our Rio ARC heater is a genuine game changer when it comes to smart home heating. One of the only heaters in the world to have an advanced WiFi module built in, ARC heaters offer a whole new level of control and are accessible from anywhere in the world via the free Rio app or directly through Apple Home Kit, Amazon Alexa or Google Assistant.

Sleek, stylish and simple to use, there's no need for wall thermostats. Just turn your ARC on, scan the QR code, and enjoy the flexibility and many benefits your ARC heater offers.

Rio ARC Smart Convector Heater – Black

| | |

FOR IMMEDIATE RELEASE

Rio Heating introduces the Rio ARC Smart Heater

Rio Heating is proud to announce a true step forward in the smart home heating sector – the Rio ARC. This new smart heater is the first in the world to be approved by Apple and is fully compatible with Apple HomeKit, Amazon Alexa and Google Assistant, so delivers ultimate control no matter which smart home solution you have in place.

With its modern curved glass finish and zero reliance upon expensive third-party thermostats, Rio ARC sets a new standard for home heating that's both practical and desirable in equal measure.

"Apple HomeKit has a huge user-base that simply isn't being catered for when it comes to home and workspace heating," commented Dave Tyrer, Managing Director of Rio Heating. "This is something we wanted to change so we've created a smart heater that not only delivers for Apple users, but also to those with Amazon or Google virtual assistants already in place. I genuinely feel that the sleek, modern look combined with the cutting-edge heating tech at the heart of every ARC makes for an accessory that's not only convenient and functional but also something that people will be proud to showcase in their homes."

Even without a virtual assistant, the ARC is fully controllable via the bespoke Rio Heating app, so even those who are taking their first steps into smart home technology can experience the convenience and financial benefits the ARC offers.

Speaking of which, these financial benefits come courtesy of the unique aluminium heating element that, when combined with the precise control systems, can deliver up to a 40% reduction on heating costs.

Smart heating just got smarter.
